

# The Order Matters

In the following table you will find in the first column a description of the order of events from an evolutionary worldview. Compare these to the biblical view by writing a short phrase in the second column that reflects the Bible's order. In the third column, give the verses that describe the order.

<b>Evolutionary View</b>	<b>Biblical View</b>	<b>Biblical Reference</b>
Sun formed before the earth.		Genesis 1:1, 16
Earth was originally a molten ball.		Genesis 1:2
Stars formed before the earth.		Genesis 1:14–15
Dry land was present before oceans.		Genesis 1:9–10
Sea creatures evolved before land plants.		Genesis 1:11–12, 20–23
Trees evolved long after simpler plants.		Genesis 1:11–13
Reptiles evolved before birds.		Genesis 1:20–2:25
Reptiles evolved before mammals.		Genesis 1:24–25
Humans evolved long after mammals.		Genesis 1:24–27

## Implications

1. As you read the text of Genesis 1, does it seem to indicate that the events described happened in a certain order?
2. How consistent is the order of events when comparing the biblical and evolutionary explanations for the creation of the universe?
3. What might you do to make the evolutionary view align with the biblical view?
4. Are the evolutionary and biblical views compatible with one another? Why or why not?
